

CHERISHTM

CHERISH is an early childhood relational model, created by Kindering, for providing support to children and their families involved with the child welfare system.

What We Do

After a developmental evaluation, CHERISH trained teams can provide a variety of supports for kids 0-3 & their families in their home & community:

- Speech, motor & mental health therapies
- Relational & educational supports for child development
- Family Resource Coordination, including material resources (clothes, diapers, etc.)

The CHERISH Model

- **Centers relationships**
- **Provides training**
- **Emphasizes advocacy**

How We Work

We support connections with parents, caregivers, and the professionals that work with them.

We support keeping families together whenever possible—preventing separation, & promoting reunification.

Supports are individualized based on parent and/or caregiver's priorities and provided at no cost to families.

Supports can remain in place even after child welfare involvement has ended.

Refer

Anyone can refer a child 0-3 for support from a CHERISH-trained provider!
